

# TR Cleaning Limited Environmental Policy

## Introduction and aim

TR Cleaning Limited is a Window Cleaning business, operating from a site in Cambridge. Our main services are window cleaning and cladding cleaning. We recognise that our operations result in emissions to air and water, and the generation of waste. It is our aim to comply with legislation and other requirements, continue to reduce the environmental impacts of our business and operate in an environmentally responsible manner. This policy describes how we will achieve our aim.

## Responsibility

This environmental policy applies to all our operations, including management, office services, site operations, and procurement. The Managing Director has overall responsibility for ensuring that sufficient resources are made available to enable the business to achieve our environmental objectives and targets and that the policy is implemented.

The Operations Manager has the day-to-day responsibility for ensuring that the requirements of this policy are being followed and for monitoring the effectiveness of the objectives. However, all employees have a responsibility in their area to ensure that the aims and objectives of the policy are met.

## Objectives

We aim to:

- Make efficient use of natural resources by conserving energy and water, minimising waste, and recycling where possible.
- Meet our duty of care requirements in relation to waste by ensuring the safe keeping, transportation and subsequent recovery or disposal of waste.
- Use recycled construction materials whenever these can be commercially justified.
- Keep transport use to a minimum and regularly service vehicles to maintain their efficiency.
- Work with suppliers to ensure they recognise and reduce the environmental impact of their products and transportation.
- Include environmental considerations in investment decisions for new plant, equipment or working practices.
- Inform and train all employees on the company's environmental objectives and how they can assist in meeting targets.
- Use the most environmentally friendly cleaning products whenever possible.

## Targets

To achieve our aims, we have set ourselves the following targets:

- Reduce vehicle emissions to air by the scheduling of work to reduce mileage and servicing all vehicles.
- Replace Internal Combustion Engine (ICE) vehicles with Plug-in Hybrid Electric Vehicles (PHEV) or Battery Electric Vehicles (BEV) or Fuel Cell Electric Vehicles (FCEV) derivatives.
- Reduce the generation of general and hazardous wastes by reducing the amount of stock held in stores and ensuring all jobs are accurately scoped and priced to ensure material usage is minimised.
- Recycle as much paper, cardboard, plastic and metal waste generated in the office as possible.
- Reduce paper usage by increasing the use of e-mail and electronic documentation.
- Reduce energy consumption by monitoring energy usage and training staff on basic housekeeping.
- Utilise local suppliers where practicable.

## **Monitoring and auditing**

Progress against these objectives will be monitored through a number of mediums, including:

- Annual management review of this environmental policy and any associated environmental procedures.
- Monthly management meetings.

## **Communication**

This environmental policy is available on our internal SharePoint page. All members of staff will receive training on the environmental responsibilities of their role and will be informed of any updates or revisions via e-mail or team meetings.
